

Please tell us how this Zoom has helped you

If you have any other ideas for future Zooms - how it can be improved or different content - pls share them here

First patient contact role

Respiratory based

consent

Would be good to go in more detail about how to assess virtually and how this how adapted treatment

Patient engagement

How things will move forward from where we are now in NHS

Back better plans

I think a review of digital consultations in 2 months would be interesting

Student placement during and post COVID. Associate workers issue. Ensuring racial equality

If you have any other ideas for future Zooms - how it can be improved or different content - pls share them here

Review of digital consultations & groups

Sharing policies and risk assessment

Student plans

Covid specific rehab plans

Emis links

Second resp comment

more MSK is great!

Shielders and regustration

Breathing pattern disorder group would be happy to be involved in assessing respiratory symptoms

If you have any other ideas for future Zooms - how it can be improved or different content - pls share them here

Identifying patients for preventative work- the ones who slipped under the radar during COVID

Making the most of limited hospital space

Frailty identification and upping community rehab status compared with acute rehab

Euan was inspirational but on the flip side seems unwilling to consider negative points to tech. He seemed to dismiss or make rebuttal arguments quickly. I feel the pros outweigh the cons but we need to make sure the cons are given consideration
